Summary

The Wisconsin ADRC requires that the National Alzheimer's Coordinating Center (NACC) Uniform Data Set (UDS) Forms be administered as a part of the standard protocol of visits for all participants enrolled in the Clinical Core. In addition, the Wisconsin Supplemental Data Forms are administered as a part of all participant visits. NACC UDS forms are standardized by type of visit (initial, annual follow-up and telephone follow-up). NACC UDS Forms and Data Element Dictionaries are all available at https://www.alz.washington.edu

Some Wisconsin ADRC forms are standardized by type of visit (A1- initial visit only; A3, A4, A5-1 and A5-2 – initial and annual follow-up) ; other forms are administered at each visit (B4, B6-1, B7-1, B8-1, B8-2, D1 and E1). There are several forms that are specific to participants in the IMPACT cohort at each visit (B6-2 and B7-2). The following is a listing of when each of the supplemental forms are used:

- IVA1 – self-report of memory problems, memory evaluations and resulting disorder diagnoses; Difficulties in school, family learning problems/disabilities (Initial visit only)

- A3 – Family medical history (Initial visit; Follow-Up visits-revisions or updates only)
- A4 – Participant allergies (Initial visit; Follow-Up visits -revisions or updates only)
- A5-1: Participant major illnesses, surgical history (Initial visit; Follow-Up visits -revisions or updates only)
- A5-2: Review of systems + Charlson score (Initial visit; Follow-Up visits -updated status on review of systems + Charlson)

- B4: CDR Worksheet (all participant visits)

- B6-1: Participant self-administered IQCODE sum (all participant visits)
- B6-2: IMPACT Participant self-assessment questionnaires (all IMPACT participant visits)

- B7-1: Informant IQCODE assessment sum (all participant visits)
- B7-2: IMPACT Informant assessment questionnaires (all IMPACT participant visits)

- B8-1: Physical Exam (all participant visits)
- B8-2: Neurological Exam (all participant visits)

- C1-1: Supplemental Neuropsychological Battery (all participant visits except IMPACT Year 1 and IMPACT Year 3 Follow-Up visits)
- C1-2: RAVLT response data (all participant visits)
- C2-1: IMPACT Neuropsychological Battery (IMPACT Year 1 Follow-Up only)

- D1: ADRC cohort assessment; Biomarker status (all participant visits)

- E1: Imaging and Lab reports (all participant visits)
- E3: MRI visit summary
- E4: LP visit summary

Neuropsychological Battery forms (NACC C1 and Wisconsin ADRC C1-1, C1-2 and C2-1): These forms are used to record the neuropsychological tests that are performed at each participant visit.

- NACC C1: completed for each visit, though the data for IMPACT Follow-Up Years 1 and 3 indicate that none of the NACC-reported Neuropsychological tests were performed
- ADRC C1-1: all participant visits except for IMPACT Follow-Up Years 1 and 3
- ADRC C2-1: IMPACT Follow-Up Years1 only
- ADRC C1-2: all participant visits

NACC A4: This form is a WADRC-revised version of the NACC A4 Form that combines the NACC required drug IDs on any medications (prescription, non-prescription and vitamins/supplements) taken by the participant within two weeks prior to the visit and the Wisconsin ADRC additional information about total daily dose, dose units, schedule or frequency, indication for taking the medication, date that the medication was started and date that medication was stopped (only if within two weeks of the visit).

Notice to Data Requesters:
When requesting data, investigators must indicate what Wisconsin ADRC and NACC data forms they are requesting, as well as the type of visit(s). Use this Data Dictionary in combination with the NACC UDS and Data Element Dictionaries to specify the forms being requested.

NACC UDS Forms and Data Element Dictionaries are all available at https://www.alz.washington.edu
