JOIN THE CONVERSATION

Learn about new NIH initiatives, funding opportunities, and ways to grow your career.

Medical students, residents, fellows, and other trainees are invited to attend this small-group luncheon and connect with an NIH administrator interested in developing the next generation of researchers, particularly those from groups traditionally underrepresented in science.

When: Friday, February 16, 2018
12:00 – 1:30 p.m.

Where: Medical Foundation Centennial Building
Room 4156

Lunch will be provided.
Please RSVP to Eva Gray Davenport at emgray@medicine.wisc.edu by February 9, 2018.

Dr. Cerise Elliott is currently a senior research program analyst for the Dementias of Aging Branch of the Division of Neuroscience (DN) at the NIA. She has been a member of the DN staff since January 2008, creating evaluation and management systems for nine research portfolios. She previously held positions at the NIH in the Office of Intramural Research and the Office of Extramural Research for the Office of the Director from 2004 to 2008 where she was the liaison with non-profit organizations, patient advocacy groups, drug industry and individuals to effectively and creatively disseminate NIH policies and programs to stakeholders.
