

What Matters Most: Drivers of Patient and Caregiver Experiences in Dementia with Lewy Bodies

June 27,
2024

3–4:30 p.m. CT
Live on Zoom

Presented by Melissa Armstrong, MD, MSc

The Dr. Daniel I. Kaufer Lecture is an educational program intended to promote and share current Alzheimer's disease research. The event is designed for researchers and professionals working in dementia care.

About the Keynote Speaker

Dr. Armstrong directs the University of Florida Health Mangurian Clinical-Research Headquarters for Lewy Body Dementia, a Lewy Body Dementia Association Research Center of Excellence. Armstrong's LBD Life Lab has funding from the National Institutes of Health (NIH) and the Florida Department of Health. Her research focuses on the lived experiences of people with Lewy body dementia and their families, including those in the moderate-advanced stages. She also serves as the Clinical Core Lead for the Florida Alzheimer's Disease Research Center.

About Dr. Kaufer

Daniel I. Kaufer, MD, was a renowned neurologist specializing in frontotemporal dementia and Lewy body dementia at the

University of North Carolina at Chapel Hill (UNC). His educational roots, however, started at the University of Wisconsin–Madison where he received a bachelor's degree in molecular biology and zoology in 1983, and a medical degree from the UW School of Medicine and Public Health in 1988. Dr. Kaufer credited the University of Wisconsin with teaching him to think like a physician.

Dr. Kaufer passed away on July 2, 2020, after receiving a sudden cancer diagnosis. He was 61. His legacy of inspiring new generations of healthcare providers lives on in this endowed lecture series.
