

Wisconsin ADRC By the Numbers

The Wisconsin Alzheimer's Disease Research Center (ADRC) studies the causes, diagnosis, treatment, and prevention of Alzheimer's disease. It also trains young scientists and provides public brain health education. The following is a summary of our accomplishments since the center was formally established in April 2009 through March 31, 2024.

41

SCIENTISTS

24%

from
underrepresented
groups

74
ACTIVE RESEARCH
STUDIES IN BASIC
SCIENCE AND CLINICAL
RESEARCH

1129

Clinical Core participants

28%

from underrepresented
groups

896

participated in Magnetic
Resonance Imaging (MRI)

619

participated in Lumbar
Punctures (LPs)

348

participated in Positron
Emission Tomography (PET)

63%

have agreed to be
brain donors

183

community
outreach and
educational
events in 2023

38

RESEARCH PAPERS
PUBLISHED LAST YEAR

181

podcast episodes of
Dementia Matters

444,435

episode downloads

23% international
listenership from

125 countries in 2023

74%

overall
Clinical Core
retention rate

86

JUNIOR SCIENTISTS
trained in
our center in 2023
