

Wisconsin ADRC By the Numbers

The Wisconsin Alzheimer's Disease Research Center (ADRC) studies the causes, diagnosis, treatment, and prevention of Alzheimer's disease. It also trains young scientists and provides public brain health education. The following is a summary of our accomplishments since the center was formally established in April 2009 through March 31, 2025.

42
SCIENTISTS

34
ACTIVE RESEARCH
STUDIES IN BASIC
SCIENCE AND CLINICAL
RESEARCH

1136

Clinical Core participants

28%

from high-risk groups

904

participated in Magnetic
Resonance Imaging (MRI)

623

participated in Lumbar
Punctures (LPs)

337

participated in Positron
Emission Tomography (PET)

63%

have agreed to be
brain donors

157

community
outreach and
educational
events in 2024

79

RESEARCH PAPERS
PUBLISHED LAST YEAR

205
podcast episodes of
Dementia Matters

513,660

episode downloads

25% international
listenership from

124 countries in 2024

73%

overall
Clinical Core
retention rate

76

JUNIOR SCIENTISTS
trained in
our center in 2024
