

Wisconsin Brain Donor Program

The path to understanding Alzheimer's disease

Your participation will help researchers develop new ways to treat or cure Alzheimer's disease. Together we can make a difference!

1

Talk with Jay about registering for the Wisconsin Brain Donor Program. He will answer your questions.

2

Talk with your family about brain donation. If you decide to enroll, Jay will help you fill out the paperwork.

3

Continue living your life!

4

After your passing, someone must call us as soon as possible using the pager number below.

5

Brain donation is done under guidance of a medical doctor. It will not affect funeral arrangements or viewing.

6

We send your family a report with findings from the brain autopsy. We will pay for this service. The donated brain tissues are stored for many future research studies.

This is an amazing gift that will have an impact for years to come!
